

**John Gianotti, P.E.**

**TxDOT TransGuide Operations Manager – San Antonio**

I am pleased to submit my name as a candidate for a Director-at-Large position on the ITS Texas Board. I have been involved with ITS Texas for the past 10 years and have become friends with the many people I have met in the organization. Since 2011 I have worked at TransGuide and have seen firsthand the value of ITS in helping manage the increase in traffic and incidents that San Antonio and Texas have experienced in that time. In 2015, I was fortunate to be able to accept a National Roadway Safety Award for the TxDOT San Antonio Wrong Way Driving program – one of only 11 awards given that year. I know that ITS can and does help to save lives every day. Being born and raised in San Antonio I have seen the city grow from a population of 500,000 to 1.5 million. I know that we can no longer build our way out of congestion – but need ITS to help manage the highway system that exists today. I will bring my 25 years of experience with TxDOT to the ITS Board as resource that can be useful in helping ITS Texas plan for the future. My personal information and experience is summarized below.

Texas A&M Class of '87, BS in Civil Engineering. Registered Professional Engineer in Texas since 1994. Twenty-five years with TxDOT including work in the Houston District, Construction & Maintenance Division in Austin, and the San Antonio District. Experience includes:

- Dist. laboratory – geotechnical analysis for bridge and retaining wall foundations
- Management of consultant surveyors for Right-of-Way mapping and surveying
- PS&E design for highway and interchange projects
- Construction Field engineer responsible for interim/final reviews of State Oversight construction projects
- Design and Construction engineer for various highway projects in the San Antonio Dist.
- Traffic engineer in the San Antonio District that included traffic signal design, construction & maintenance, signing & striping design/review, and various traffic issues.
- Current position is the Operations Manager at the TxDOT San Antonio TransGuide office responsible for the design, construction & maintenance of the ITS infrastructure - CCTV cameras, DMS boards and fiber optic network. Manager of the TxDOT SA HERO program, the San Antonio WWD program and the San Antonio Traffic Incident Management (TIM )group.

I live in my hometown of San Antonio with wife Katie and daughters Emily and Caroline.
